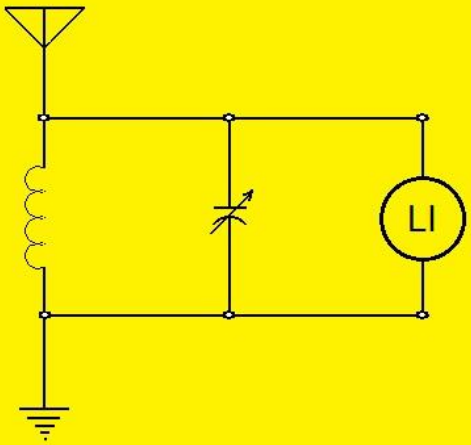
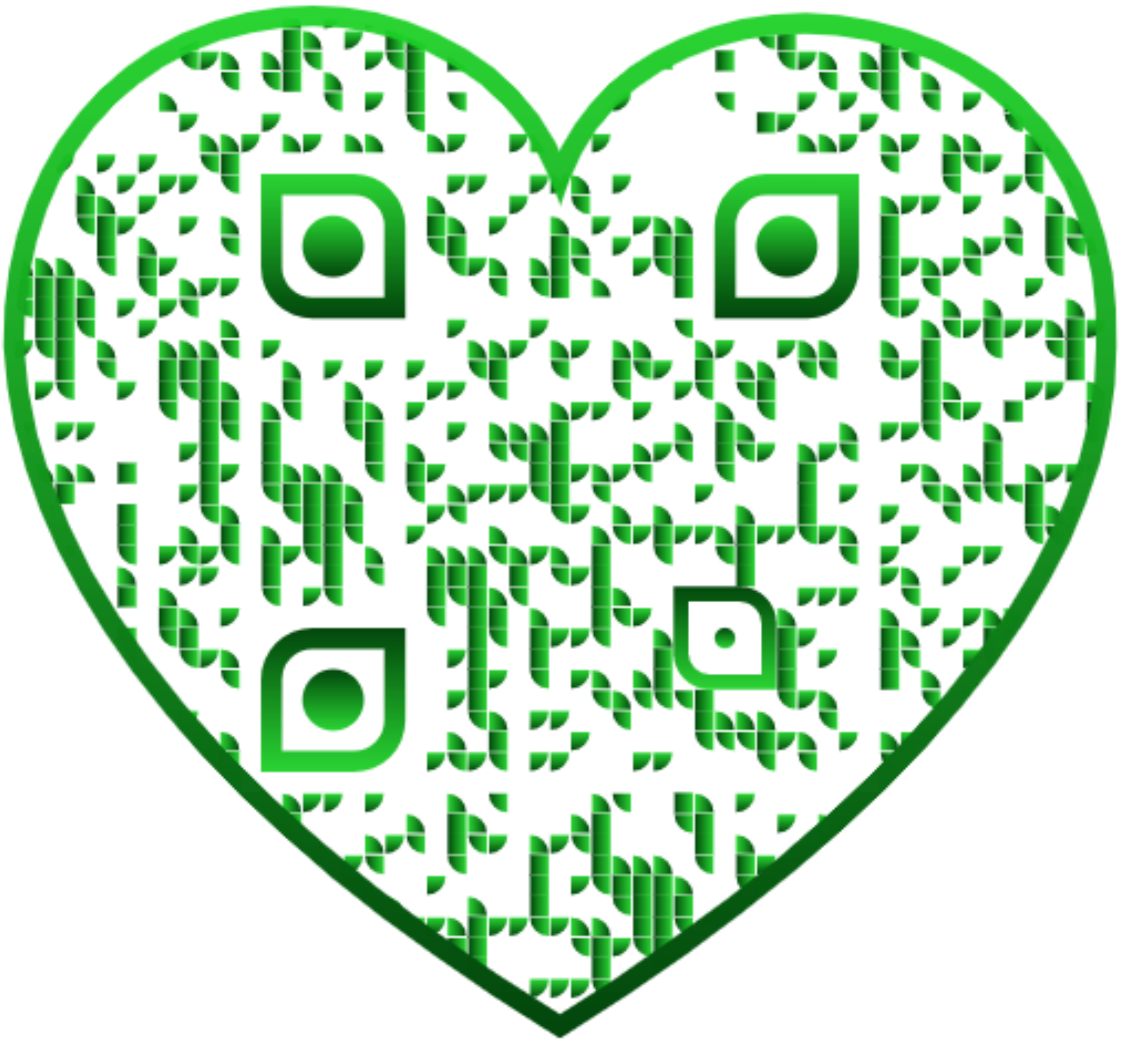
DR. REICH'S ORGONE IS THE SIGNAL OF LIFE



by

James A. B. Mahaffey, Jr.



INTRODUCTION

In my first Soul Science Technology ebook - 29th Century Technology for Engineers and the associated ebook Soul Science Technology: Training Circular – 401: Iron walled ORACS and LV *SRs* - I briefly review what the **Living Energy** is so that the experimenter/inventor would not have to read my first book Soul Science. Thus it became obvious – according to my friends – this ebook was needed to explain (in more detail) what the **Living Energy** is and the difference between the associated components of the **Living Energy** in this dimension.

Dr. Reich's Orgone is the Living Energy

TABLE OF CONTENTS

1 What is the Living Energy (LE)?

1 What is the Living Energy (LE)?

One of the things I wanted to avoid – when I started my life's work in December of 1986 – was using cliché words and phrases.* I refused to use the phrase “life energy”. Too many people had preconceived ideas and notions about what “Life Energy” was. In 1986 I knew nothing of Dr. Wilhelm Reich's theory of “Orgone”. I knew he had been the heir apparent of Sigmund Freud and was a psychologist from my Western Humanities class in college – however I did not know anything else about him or his work in the field of Non Physical Energy. The word “energy” in physics means the ability to do or accomplish work. It is in reality a mathematical placeholder that defines molecular interactions between two or more bodies of matter. Hence engineers talk about “mechanical energy”, “heat energy”, “kinetic energy”, “potential energy” and “electrical energy”. As a young degreed engineer fresh out of an accredited engineering curriculum there was no way I could even say “life energy” much less write it!

* Of course I did not know I was starting my life's work – I thought I was writing a short technical report, for scientists, about the human **Soul** and **Ghost** from an Engineer's point of view.

In my first book Soul Science: The Electric Analog – I defined **Life Electricity** (**LE**) because I saw the “Soul” as a real thing that behaved like an electrical phenomenon in this dimension.[1] I modeled the “Soul” and “Ghost” as real things using engineering problem solving techniques. Over time I began to realize that my generic term **Life Electricity** had been the best choice, because I could see differences that were remarkably like the differences between “signal” and “current” in electronics.[2] In the course of testing my theory I developed an “Ohm's Law” like equation for **Life Electricity. Life Current** (**LI**) equals **Life Voltage** (**LV**) times **Life Resistance** (**LR**).

1 In my first book I used single quote marks to delineate my Soul Science definition of words already in use in the English language. My wife did not like the single quote marks so I changed the single quote marks in my companion book Souler Power: Your Electric Soul (which has no math) to bold font.

2 A voltage for example can be varied to produce a “signal”. Signal generators

in electronics produce waveforms that can be injected into a circuit to test the circuit or study its behavior. A signal generator is not a power generator.

After I sent my first book to the US Copyright Office in 2001 – I began to investigate a pioneer in modern psychology that my friend, an ER Doctor, had told me about.[3] The implication of the article, in the Volume III, Number III June 1997 issue of Alternative & Complimentary Therapies, is that THERE COULD BE TECHNOLOGY INVOLVED! Prior to my reading that article – I viewed **Life Electricity** as an "internal" or "soft" energy as the Chinese Taoist, Kung Fu and Thai Chi Chi Kung schools refer to "Chi". Because I started in December of 1986 with direct personal experience of Japanese "Qi" and Chinese "Chi" – I approached the study of the Living Energy from the perspective that by living a certain way (breathing, eating and sleeping correctly) and by practicing certain "Chi" conservation techniques – any human "could become alive in the Spirit"! And as a result have unlimited immortality. When I sent my first book to the US Copyright Office in 2001 I had a complete and tested theory of this "internal" or "soft" energy, as the third part of the human Mind-body-Soul triad. When I began to investigate the technology aspect of this Non Physical Energy in late 2001 – I had a very different perspective of the **Living Energy** than Dr. Reich.[4]

3 My friend gave me his extra copy of this magazine because he thought my description of my first book was a rehash of Dr. Reich's Orgone work. The article talked about Dr. Reich's "Cloud Buster" and weather control. I told my friend the next time I saw him that my book had nothing to do with weather control. He did not argue with me. Of course he knew much more about the body Dr. Reich's Orgone work – however he did not tell me about it.

4 I learned Judo first when I was in elementary school. I was astonished by "planting" where by forcing the breath ("Qi") downward, from the harra, toward the ground – you could NOT be moved! Later in junior high school, when I learned Karate and was amazed at the idea of using the "Qi" to apply force through an opponent! When I was in college I studied the "internal energy" or the "Chi" of Kung-Fu for defense. After I had been working on this project for several years – I learned the manipulation and control of the "Chi" in Thai Chi Chi Kung. It was at this point that I discovered the missing text book for beginners – The Emperor's Mind Seal Classic translated by Alvin Olson!

Of course Dr. Reich viewed his work as scientific and was convinced he had discovered a heretofore unknown force of nature. As I began to study the information that was available on the Internet in early 2002 - I could see that Dr. Reich's "Orgone" was the **Signal of Life**, which I had defined early in 1987. In my opinion Dr. Reich would have eventually seen the differences I saw – if his life had not been cut short.[5]

5 The FDA arrested Dr. Reich, put him federal prison, destroyed his laboratories and every Orgone Accumulator (ORAC) they could find and burned his books! He died shortly before he was to be released!

When I sent my first book to the US copyright office, the second time, in electronic format, in 2002, "bound" in a CD ROM (my first submission was a printed copy), I named my Ohms' Law like equation, for the components of the Living Energy or **Life Electricity,** "Reich's Law" in honor of Dr. Reich.

LI = LV ● LR Reich's Law

Life Current (LI) is released by the **Material Cause** (**MC**) during planet formation to bring forth life!* It is also released by the **MC** at various times during the evolution of a planet to support life and ultimately to bring forth sentient life. It is these processes that Dr. Reich stumbled across in his efforts to disprove the rebuttals from his detractors and skeptics. You see Dr. Reich's bion culture creation process is very similar to planet formation and early life formation on planets.[6]

6 The Cancer Biopathy by Dr. Wilhelm Reich

One of the reasons scientists and experimenters have failed in their efforts to replicate Dr. Reich's Orgone Accumulator (ORAC) research is because they skip the bion culture creation process and they do not place bion cultures inside their ORACs! In all fairness, (something skeptics and critics do not deserve) Dr. Reich did make a mistake – when he assumed the "blue streaks" (waves) he observed inside his first insulated Faraday cage – was not the result of the SAPA (ocean sand) bion cultures that had been stored in that first ORAC![7]

7 29th Century Technology for Engineers by the Author - - I discovered his mistake when I finally obtained, read and analyzed an original copy of Dr. Reich's book translated into English (from German) by his friend and associate Theodore P. Wolfe – who included his own commentary! This book was published by Dr. Reich's Orgone Institute Press. See the Bibliography.

One of the reasons scientists do not replicate his bion culture work (or even examine his research) is because Dr. Reich's bion discovery and his work with bions (films, tests and observations) – clearly points to a completely different theory of life creation and evolution! And that pissed off the so called scientists of his day. Once the scientific community decided Dr. Reich's bion theory was wrong – that was it – game over! To this day Dr. Reich is considered a "quack" by the American Medical Association and Biologists today view his work with bions as nonsense. Yet these same people cannot explain why a fertilized egg cell divides!

I recognized in 1987 that cell division releases **Life Current**![8] And as a result an organism's **signal** strength increases, after cell division, because there is more **Life Current** coursing through the organism. This is why after a certain number of cell divisions (age) – organisms begin to suffer – because cell division stops! This is referred to as "senescence".

8 Soul Science: The Electric Analog by the Author

Biologists cannot tell you why a fertilized egg cell divides – because they have placed their faith in DNA. DNA however is nothing more than a recipe book or a set of formulas! DNA is like the specifications for the building materials to be used in the construction of a building that is contained in the back of a set of blue prints! DNA is not an architect nor is it a construction foreman! Yet – biologists would have you believe that DNA brought you into being and made you the person you are!!

The very fact that biologists and Medical Doctors are still taught Newtonian or "Classical" physics proves these disciplines are not

scientific! Science moved past “Classical” Physics in the 1940s! Many Doctors still swear an oath to ancient Greek Gods!

Dr. Yayama stated that if Western Medicine ever teaches Quantum Mechanics in Medical School to premed students –
Western Medicine will make tremendous advances in maintaining health and curing disease.[9] Make no mistake – science became a religion in the 20th century – and if you are not a member of the “church of science” and dare to step out on the cutting edge – your work will never be accepted. Of course the basic problem with all religions on this planet is intolerance. Religions do not allow alternative or unaccepted ideas. Thus a member of the “church of science” shall never do anything that might jeopardize his or her funding and reputation!

9 Qi Healing: A Way to a New Mind and Body by Toshihiko Yayama, M.D.

One of the most amazing things that I realized in working on my first book was that evolution on this planet was a direct result of the Earths loss of its **Life Current** early in its evolution. (The fossil record clearly shows that a massive extinction event, of every species occurred, in the early, shallow ocean of the Earth.) You see the only way that creatures born on this planet can change their shape or physical form is through reproduction. This change is referred to as a “mutation” in real time and “evolution” in geologic time. If we travel to other worlds around other stars in this galaxy – we shall see that evolution occurs on our home world because our world is weak **discharged**. Thus I called it “Apparent Evolution” in my first book.

I knew in 1987 that biologists could not explain why a fertilized egg divides the first time. Of course biologists do not follow Dr. Reich's microscopic procedures and will never see bions form on decaying, once living biological structures.

The **Life Current** – that is released by the **Material Cause** is “Non Physical” Energy (NPE). It has had many names over the years since World War II such as “the energy of the Void”, “vacuum energy” and the erroneous “free energy”. Dr. Reich was not the first human being

to discover or use this energy.[10] However he certainly was the first human being to scientifically document its properties. Franz Anton Mesmer a German Physician in the 18th Century, postulated his theory of "Animal Magnetism" in which he defined a "Universal Fluid" that moved through everything. Science would later call this "Universal Fluid" the Ether. The "Ether" of classical physics is **the Material Cause**.* Louis the XVI of France appointed a commission of scientists that included Ben Franklin to scientifically investigate Mesmer's claims. Louis the XVI's Mesmer Commission reported that Mesmer "could not support his scientific claims"! Interestingly there were several other pioneers working with this Non Physical Energy (NPE) around the same time as Dr. Reich. Pioneers such as Hieronymus, Morey, Schauberger and Dr. Abrams. Of the four men – Viktor Schauberger saw the energy for what it was in the course of his work for the Nazis SS science division.[11]

* For more information about Mesmer see the Bibliography. The **Material Cause** (**MC**) is covered in Chapter - 3.

10 Religious temples and burial sites around the world release **Life Current** because of the materials used and the design of the buildings and burial sites. Even the Great Pyramid of Giza is releases **LI** because it has hollow walls that are filled with minerals! See my first book 29th Century Technology for Engineers for more information about this.

11 The Hunt for Zero Point by Nick Cook

Life Voltage (LV) is very much like voltage in electricity. It can be very large – however it is the current or lack of it that will kill you. I had noticed, after my introduction to the Chinese concepts of "internal energy" ("Chi"), that many Chinese schools were talking about signal – they were not talking about current!

After I began seriously studying Chinese "Yin Chi" and "Yang Chi", I began to realize life has many **signals** or "flavors" just as the **MIND** has many **Mind** packages – each according to the creature's level of consciousness and physical evolution.

So when I made the connection between seed bodies such as oranges and lemons with animal fat cells – I knew there had to be a **Life Resistance (LR)** component! Fat cells store **Life Electricity**! I had read in the late 1970s that some people – who had all of the fat cells sucked out of their bodies – died if not on the operating table – shortly thereafter! I connected this with the apparent poor health of overweight people. It seemed to me that as long as the overweight person maintained their **level of charge** – they were healthy. If they **discharged** themselves (by sex, drugs and rock-and-roll) they became ill and died.* Thus fat cells somehow impeded (resisted) the flow of the **Life Current. Resistance** is required to store the **Living Energy**!

* A **discharged** overweight person cannot **recharge** themselves fast enough, especially after they reach a certain age...

What does this information have to do with understanding the **Living Energy**? I made the connection between Dr. Reich's observations of his “bion” behavior and the interactions of “bion radiation” with “organic” and “inorganic” materials and the **Life Current**. I realized that even so called non-living matter gives off **signal**. Thus I was applying the concepts of **Life Resistance** to the throughput of **Life Current** within a given cross-sectional volume of matter! From this I was able to develop the **Laws of Spiritual Mechanics**. See Annex - 1

2 Dr. Reich's “Orgone” is the Signal of Life

In my first book Soul Science: The Electric Analog – I defined the **Signal of Life**. All life and in fact all matter produces a specific **signal**. So called inanimate matter – gives off an **ELOPTIC Signal**. (I named the signal given off by “non-living” matter in honor of Dr. Galon T. Hieronymus.[12]) Living tissue generates a living signal or **signal of life.** The **signal of life** is a “field effect” of the **Material Cause**. The **signal of life** is a specific, defining characteristic of the life form that produces it. Dr. Reich could not distinguish between the **signals of life** which are a generated by life and the **Life Current** (**LI**) that is

released by the **Material Cause**! See Chapter - 3.

12 Galon Thomas Hieronymus invented and patented the first “Psychotronic Device”. See US Patent number: 2,482,773, “Detection of Emanations from Materials and Measurement of the Volumes Thereof”. During the patent claims review process, the patent examiner for the US Patent Office forced Hieronymus to name the radiation that his device detected – he called the radiation “Eloptic” See Annex – 7 in the Appendix. I cover this invention in my second 29th Century Technology for Engineers book – Passive Mind Intent Devices.

Thus an ORAC (Orgone Accumulator) of Dr. Reich's design that is assembled in a clean room, using clean room techniques, that prevents DNA contamination, that is not “primed” with SAPA bion cultures, can NOT release **Life Current**. I reported this mistake in my first 29th Century Technology book.

Dr. Reich had been so saturated with **Life Current** from the bion producing cultures he experimented with, (long before one of his students stumbled across the strongest culture when she accidentally used ocean sand in a bion culture process demonstration) that his mere presence during an ORAC test or operation affected the observations!

Thus Dr. Reich made the mistake of confusing the **Life Current** (the “blue waves”) released inside an insulated (wool layer) Faraday Cage (early ORAC design) “primed” with SAPA bion cultures with the **signal of life** generated by a living being entering a non “primed” ORAC or the Life Voltage left behind in the DNA of a living being that constructed the ORAC.

Dr. Reich did not realize that his early ORAC (the wool insulated Faraday Cage) was “charged” by the SAPA bion cultures that were placed inside the *device*. Nor did he realize that his own bion culture “radiation” saturated body was also charging the ORAC. At some point after extensive observations inside his first room sized ORAC (the wool insulated Faraday Cage) – he made the mistake – and assumed that all ORACs constructed to his specifications would

produce the “blue waves” that he had observed inside his first room sized ORAC (the wool insulated Faraday Cage)! He called the phenomena that he observed inside his Orgone shooter box devices and his Medical ORACs: “atmospheric Orgone” - because he saw the blue **signals of life** in the atmosphere. For more information see my first 29th Century Technology for Engineers book and the associated Training Circular (TC-401). These books are listed in the Bibliography after the Appendix.

I refer to the books in this series as SST books. My book Soul Science Technology: How to Recharge Your Soul and Ghost: SES vol-4 is meant for the True Seeker. The Joe Cell Experimenter and the ORAC experimenter should read TC-401, which is better suited to their needs.

I presented in my second Training Circular how a discharged “patient” sitting inside a non “primed” IWO (iron walled ORAC) could attain the same benefit as a Thai Chi Chi Kung practitioner.* I could not understand why Dr. Reich insisted on having the internal walls of an ORAC made of bare iron sheets until I obtained an original copy of his book The Cancer Biopathy (published by his Orgone Institute Press) which contains the complete list of bion behavior and his early experiments with Faraday cages! It was during my study of this book by Dr. Reich that I discovered his mistake.

* Soul Science Technology: Training Circular – 401: Iron Walled ORACs and LV *SR*s

So what is the difference between a signal and current? In my first book Soul Science I presented the definitions of “signal” from the Dictionary of Electronics and the American Heritage Dictionary as follows:

signal - An indicator, such as a gesture, flag or colored light that serves as a method of communication. A message that is communicated by such a method.[13]

signal - An electrical quantity that conveys information by varying in some manner.[14] An impulse or a changing electrical quantity, such as a voltage, current, or electromagnetic field, in which information can be coded or

transmitted.[2]

13 A Dictionary of Electronics, by S. Handel , Third Edition, A Penguin Books, ISBN: 0 14 051.019 2

14 The American Heritage Dictionary

What is the difference between “current” and “signal” in a wire? The difference is the intelligently designed controlling circuitry that causes the “current” to behave in a certain way. So therefore an electric current can be a signal however it is much more - it is information, pattern – consciousness!

So with this definition from electronics – I developed the Soul Science definition for the unique living **signals** all creatures broadcast.

Continuing the electronic and wireless (radio) analog I presented that signals or information can be transmitted within a circuit or between circuits by varying or oscillating the voltage or current or both. The wave established inside the conductor of a radio antenna is a “vibration”. Thus when new age gurus talk about “vibrations” - they are talking about **signals**.

The best way to think about the difference between current and signal for the purposes of using **MC** based technology is by studying a Radio. (Other examples - such as the High Voltage AC current that is broadcast down high tension wires – causes too much confusion.) So “wireless” is the best example to review.

Let us look at your wireless router. Your wireless router – whether it is contained in your cable modem or it is in a separate box – is always broadcasting. The radio signal your wireless router broadcasts – contains information – the very definition of signal. It is this information contained in the broadcast signal that allows you to

“connect” your phone or tablet to your “wireless device”. (You see in your Wi-Fi menu “Netgear841” for example.)

The electrical power (from an AC wall outlet) that is controlled by the “mother board” (circuit) in the form of voltage, resistance and current in your wireless router is greater than the power that is broadcast through the air by the antenna of the wireless router. Granted there are other electric and magnetic forces controlled in the circuit – such as capacitance and inductance – however for the purposes of this book we shall focus on current and voltage and signal.

So all life forms **broadcast** their **signals** just as Wi-Fi routers do. This is also true of all so called “non-living” matter. Before I completed my first book – I would tell people that matter had a signal like Direct Current from batteries and “life” had a signal like Alternating Current – similar to the current that comes out of a wall outlet.

Dr. Reich's ORAC made by a carpenter (originally male and then a female) was, because of the carpenters DNA left behind in the construction process, a **signal** “generator”. The **signal** of the Carpenter was amplified – for better or worse – by the ORAC he constructed. If an ORAC of Dr. Reich's design is manufactured in a clean room environment and delivered to the final user without contamination – the device only amplifies the **signal** of the end user. If the user does not clean the inner steel wall of the ORAC – it will become polluted with the **signals** of bacteria (growing on the steel) and any insects that crawled inside it!

3 How does this all work?

The first thing to realize is that everything on and below the surface of the Earth, in the water, and in the atmosphere moves through the **Material Cause** (**MC**) as the Earth spins on its axis and orbits the Sun. See Diagram 3. Some "accepted" Ether theories suggest that a chunk of the Ether moves through space with a planet as it orbits.

This seems to be an unnecessary complication. It may in fact be true, but it is not necessary to start with that assumption in order to model Quantum Particle behavior on a planet's surface.

One of the great attributes of Engineering - is that you do not have to have all of the information to begin to "work on" or solve a problem. You can pick a "free-body-diagram", apply some basic equations and start solving the problem! Test the results and if necessary pick another "free-body-diagram" and solve it again. This iterative solution process is the reason engineers were taught how to program computers and use "numerical methods" until the 1980s.

I picked a free-body diagram that depicts the Earth suspended in the **MC** as it "spins" on its axis as it moves through the **MC** around the Sun. No doubt there are FQPs moving with the Earth through the **MC**. Note: I say the Earth is "moving" however - I think the **MC** is moving - like a wave around the Sun and thus the Earth is "moved" along by the **MC**. Again - my free-body-diagram may be incorrect - however the math seems to support my interpretation. In Engineering a theory is only as good as the test results and the math that supports it.

Thus something on the surface of the Earth can have a free-body diagram that shows the **MC** or “bound” Quantum Particles (**QP**) moving through the body rather than the body moving through the **MC**.

Thus because the Earth moves through the **MC** - the "bound" **QP** can be modeled as moving through anything that is on, in or near the Earth's surface. See Diagram 4.

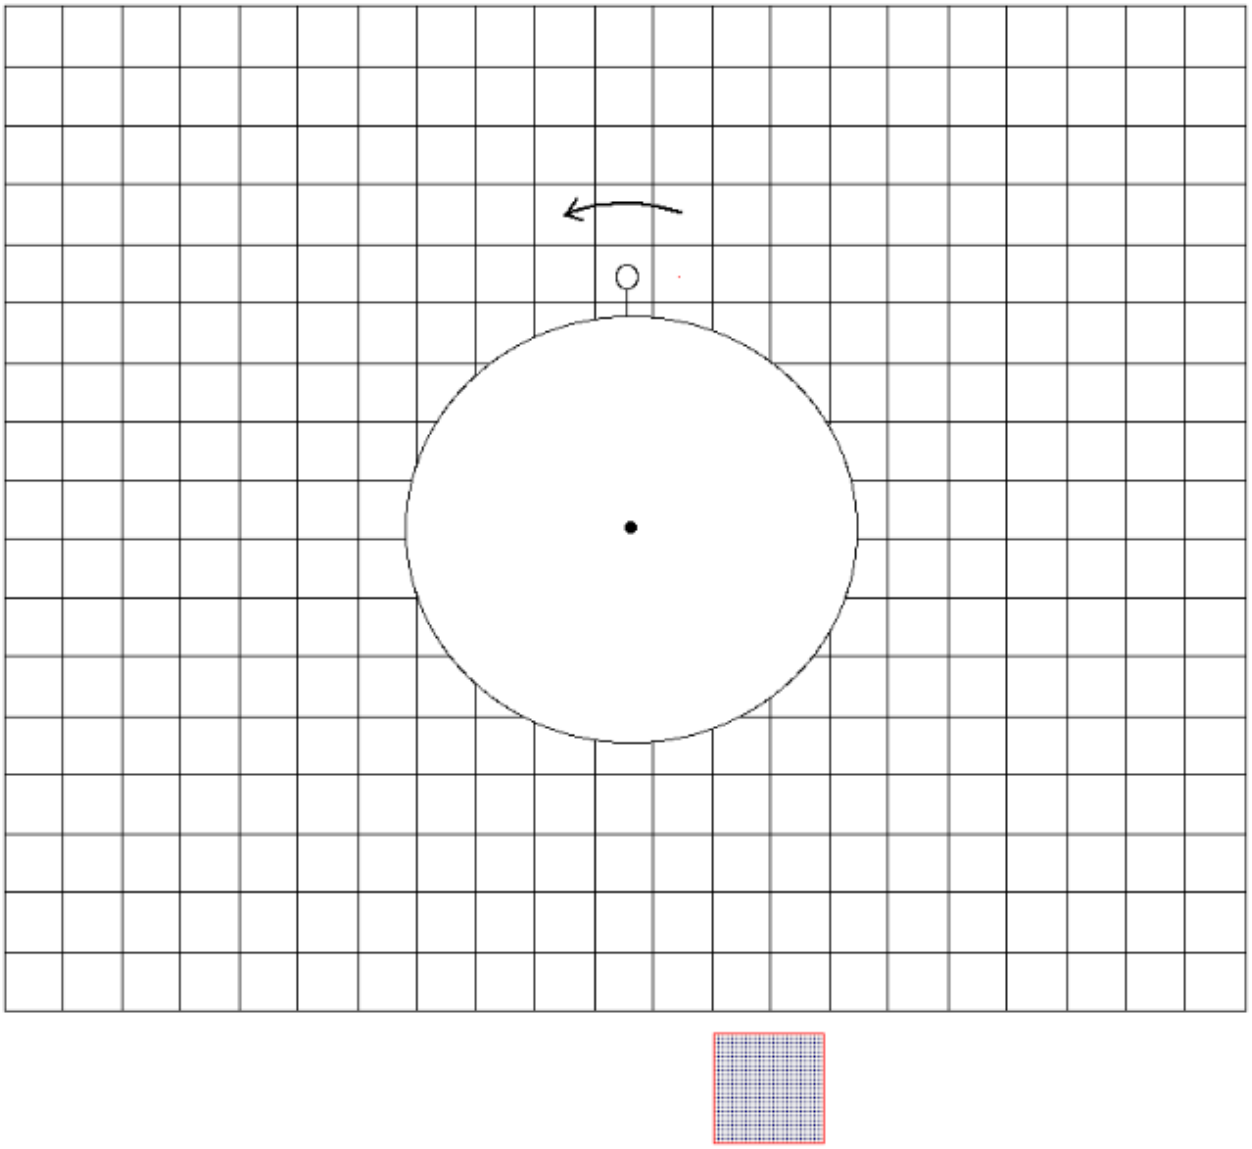

Diagram 3.1: Body on the Earth's surface moving through the MC as the Earth “spins” on its axis of rotation.
The red dot out in front of the face of the body is enlarged and is shown below the graph.

NOTE: This drawing is NOT drawn to scale.

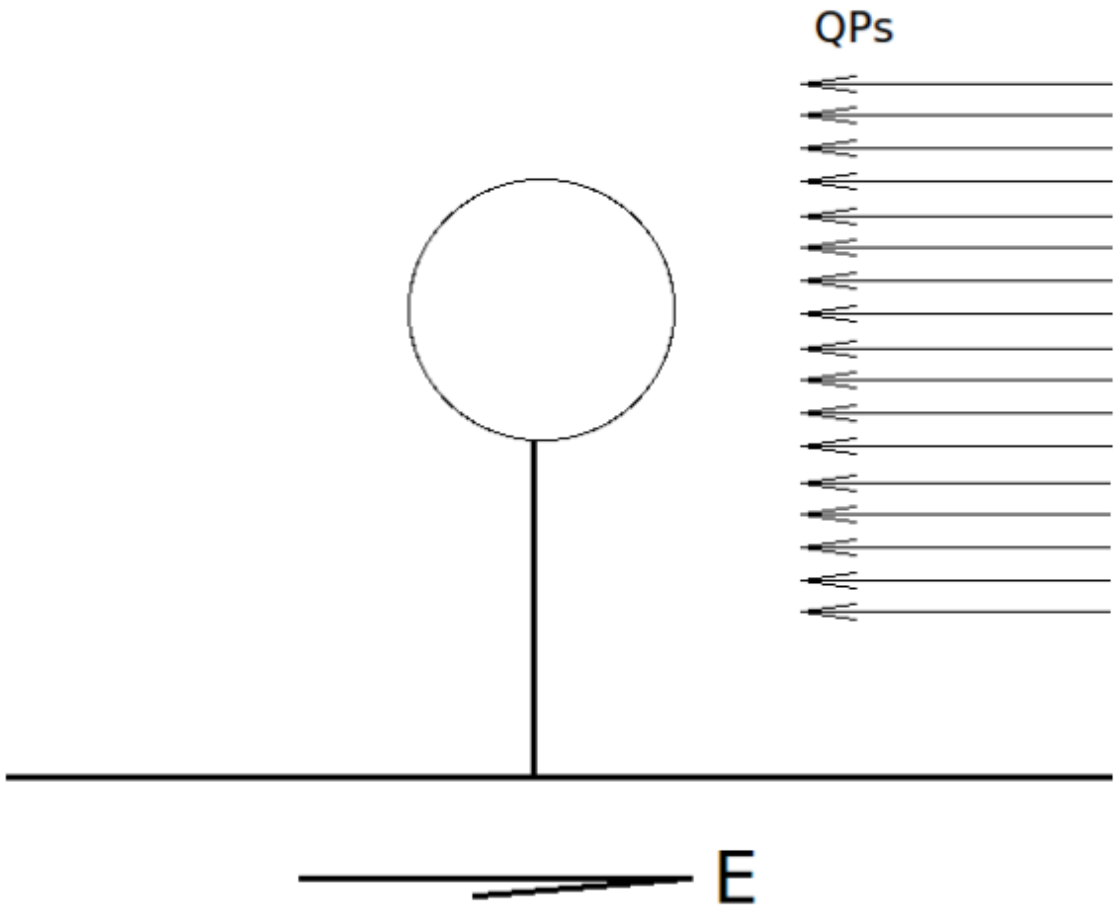

Diagram 3.2: The **QP** of the **MC** moving through a body on the Earth's surface

The **MC** is the classical "Aether" of Sir Isaac Newton and the undefined "rubber sheet" of Einstein.* The **MC** is made up of "bound" or constrained Quantum Particles (**QP**) in a three-dimensional, lattice like structure in this dimension. This QP lattice or **MC** is the "event horizon" of our Universe. See Diagram 3.4.

* Einstein never explained where his "rubber sheet" obtained its energy. However he did state at a Physics Symposium that the Ether must exist. Reference: The Ether Dispute

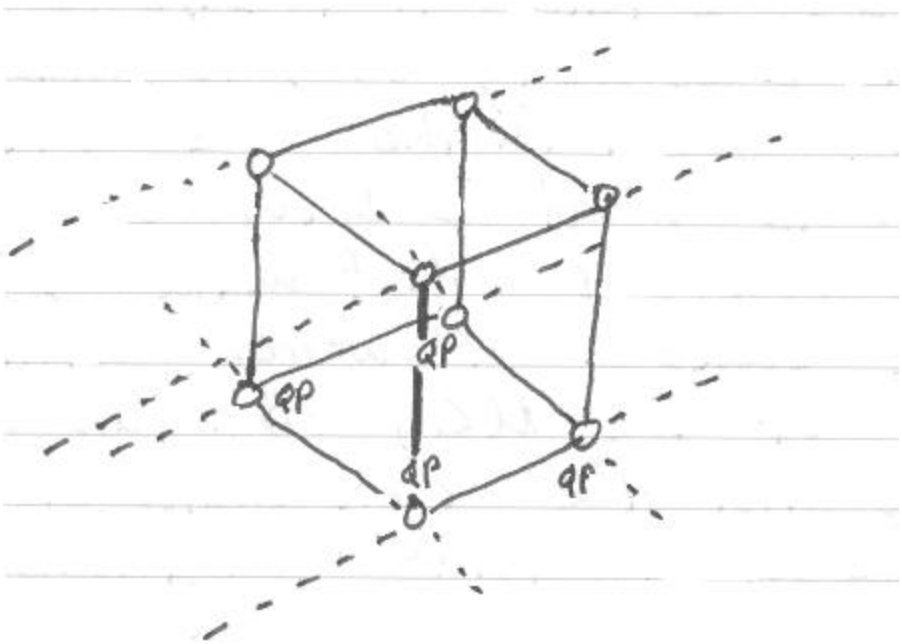

Diagram 3.4: Depicts the “lattice” like structure of the “bound” Quantum Particles (**QP**) that make up the **Material Cause** (**MC**) or the “Ether” or the “Void”

The distance between the lines is a fraction of an angstrom

Yes – the lines between the **QP** are waving up and down this is how the “static Ether” supports electromagnetic radiation (light, radio and gravity)...

In addition there are "fee" QPs (FQP) that are associated with the **MC**. These "free" QPs are not the "dynamic ether" that flows through this Universe that was experimentally verified by Dayton Miller.[15] More on the "dynamic ether" in a later release of Soul Science Technology.

15 The Orgone Accumulator Handbook by Dr. James DeMeo

The "bound" Quantum Particles (QP) known as the "Static Ether" provide: "gravity" (and electromagnetic radiation aka light) and "consciousness" in this Universe and support "Mind Intent". This is summarized in the following Delta Equation from my first book Soul Science.

$$\Delta QP + \Delta M = \Delta MTR$$

The FQPs are what the **MC** releases into this dimension when certain conditions are met. Some scientists have labeled these mysterious particles - "virtual" particles because they inexplicably appear out of the “quantum vacuum” (**MC**)...

There is much confusion between the "dynamic Ether" and the so called "static" Ether. I explained in my first book Soul Science: The Electric Analog (SSTEA) why the Material Cause (**MC**) is "static". I suspected there was also a river of Quantum Particles that moved through this Universe, however I did not discover the nature of the "dynamic Ether" until I began working on Soul Science Technology and read about Dr. Dayton Miller. For more information about Dayton Miller read The Heretic's Notebook # 5. (See the Bibliography)

For the purposes of this Training Circular - the "static" Ether or **MC** is the key to understanding the **Living Energy** or **Life Current**.

The "Void" or as I prefer the **Material Cause** (**MC**) of the Universe - releases vital **Life Current** whenever certain specific events or conditions occur in a planets evolution. This is how the Universe brings forth life on the myriad planets in the "billions and billions" of galaxies that are visible in the "13 billion year light cone". This controlled "living energy" is released throughout the planets life for the living creatures that inhabit the planet.

4 Dr. Reich's “Orgone” Accumulator (ORAC)

I defined the following words and phrases in my first Soul Science Technology (SST) book, 29th Century Technology for Engineers:

(1) *Device* - A Region-3 physical construction that accomplishes a manipulation of Region-0 or the "Void". Note: Regions are explained in Annex – 2 of the Appendix.

(2) *System* - A group of Region-3 constructs that work together to accomplish manipulation or control of Region-0. Note: Regions are explained in Annex – 2 of the Appendix.

(3) *Orgone amplifier* - A *device* that collects and amplifies the **Signal of Life** (Chi, orgone, Prana) or the **Signals** of living beings that either enter the device or leave behind their DNA in the construction or use of the device. This can be a frequency change or a **Life Voltage** (**LV**) change.

The **Signal of Life** is "generated" by living beings.

A Region-3 *device* can only amplify the **Signal of Life** - it cannot create it!

(4) *Amplifier* - A *device* or *system* that increases the **Signal of Life** or the **Signals** of living beings.

(5) **LE** *transformer* - A *device* that causes the "living energy" to be released by the Void or **MC.** The living energy in this dimension is **Life Current** (**LI**). **Life Current** is what SAPA bion cultures release.

A Region-3 *device* can only transform the **Life Current** – it cannot “generate” or create it.

(6) **IWO** – Iron Walled ORAC

(7) **Life Current (LI)** *device* – A *device* that can deliver any **Life Voltage**.

(8) **Life Voltage (LV)** *device* – A *device* that can deliver any **Life Current.**

I presented Dr. Reich's **IWO** as a **Life Current (LV)** device. An **IWO**, made to Dr. Reich's specifications, does NOT collect “atmospheric orgone” (**signal of life**). However the “orgone” (**signal of life**) that an **IWO** collects / amplifies is the “orgone” (**signal of life**) generated by

the living being that enters the ORAC or builds it!

Digram 4.1 is a cross-section of a standard ORAC or **IWO** of Dr. Reich's design.

Diagram 4.2 is from my first Soul Science Technology (SST) book. It depicts a person inside an **IWO** – basking in their *amplified* **signal** and the **signal** of the person who built the ORAC.

The iron sheets on the inside of the ORAC reflects the person's **signal** back to their body and the “plies” of material around the iron sheets amplifies the **signals** (user + builder) in the ORAC.

Dr. Reich had a process for “cleaning” the ORAC – because he allowed his ORACs to be shared! I pointed out in my first SST book that you should not share your **LV** *SR*. The reason – an **LV** *SR* is not an ORAC of Dr. Reich's design or **IWO**. You could take on the ailments of the people you allow inside your **LV** *SR*!

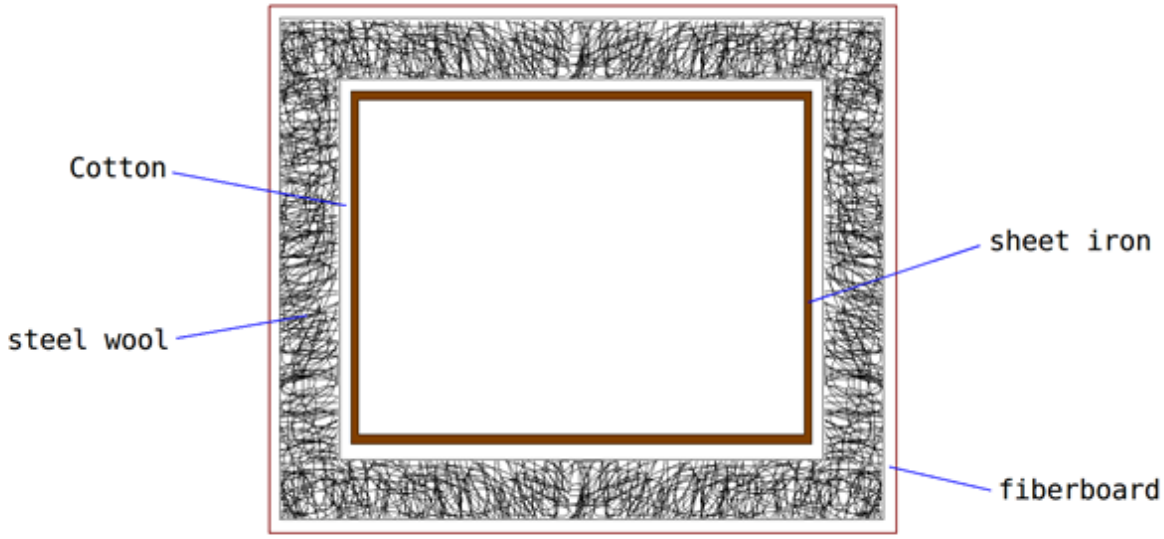

Diagram 4.1: ORAC (**IWO**) of Dr. Reich's design

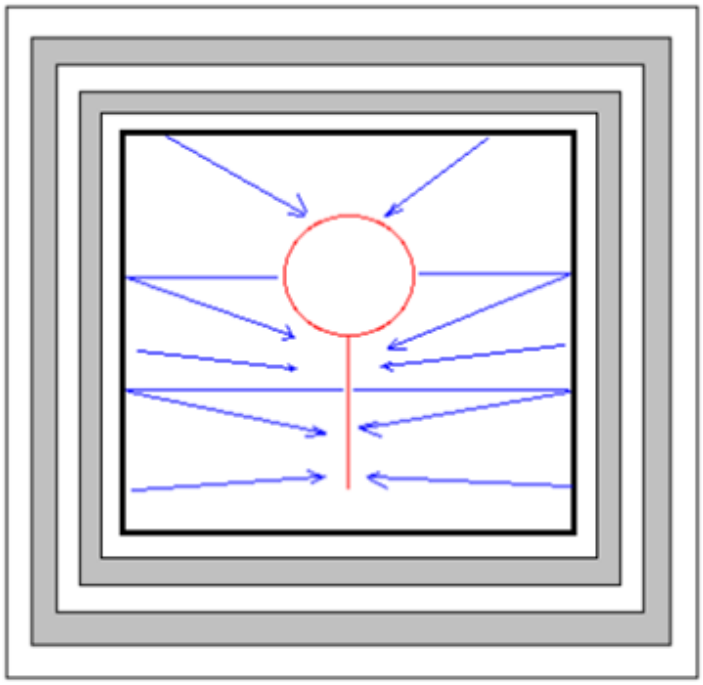


Digram – 4.2: Iron walled ORAC (IWO) with 2 “plies”
Typical cross-section of an ORAC of Dr. Reich's design reflecting a person's signal

Thus Dr. Reich's **IWO** can help a **discharged** person – just as Thai Chi Chi Kung can – so long as the person is not **deeply discharged**.

I also presented another thing I discovered reading Dr. Reich's original published book The Cancer Biopathy – in my first 29th Century Technology book – the carpenter's daughter started making ORACs for Dr. Reich after her father got sick! Her DNA was in the ORACs she made and as result so was her female **Signal** or “Yin Chi”! Thus the ORACs she built would not help female patients with cancer! Cancer is “paralyzed” (as Dr. Reich documented) by the **Living Energy** that is released by SAPA bion cultures. Cancer is also stopped by “Yang Chi” as demonstrated by Taoist and Chi Kung Masters. In other words the “Yang Chi” **signal** given off by the male DNA left on the materials during construction of an ORAC - STOPS CANCER! The “Yin Chi” **signal** does not. **Note: The FDA has not evaluated this information.**

Thus an **IWO** of Dr. Reich's design made by healthy males – in which their DNA is left behind – provides more to the person who enters the *device* – than their own "orgone" (**signal of life**)! The **IWO** "amplifies" the "orgone" (**signal of life**) of the male(s) who made it via the DNA they left behind! **Note: The FDA has not evaluated this information.**

WARNING: Many people on the Internet today claim to be selling ORACs or Orgone "generating" devices made to Dr. Reich's specifications. Dr. Reich specifically warned that ORACs made of aluminum are very dangerous and should NOT BE USED! Mice placed inside aluminum ORACs lost all of their fur and died in a very short time! Aluminum is a known brain cell and neuron toxin! I advise everyone to avoid contact with all aluminum! Aluminum does not naturally occur as an ore on this planet. It has to be assembled unnaturally by chemical and electrical processes! The **eloptic signal** that aluminum gives off is not healthy!

Appendix

Annex - 1 The Laws of Spiritual Mechanics

The following Spiritual Laws are important for your complete understanding of **Soul Science Technology** its use and how it will affect you.

Spiritual Mechanics

1st Law: Nothing is impossible – and with sufficient **spiritual energy** anything is possible.

2nd Law: EHBs with the "Holy Spirit" can *program* any d*evice* or *system* or *technology* via the M2 Interface.

3rd Law: The **signal** of a living body of greater **spiritual energy** **overwrites** any nearby living body of lesser **spiritual energy**. [Abram's Law] This process **discharges** the stronger living body. See SSTEA or SPYES for more information.

4th Law: Life Current flows from weaker **Spiritual bodies** to a stronger (**fully charged**) **Spiritual body**.* A **LV** device outputs **LI** when it is connected to a *living system*.

5th Law: No organism, physical body or **spiritual**: *device* or *system* or *technology* can violate the 4th Law by itself or exceed (overcome) the 6th Law.

6th Law: No *device* or *system* or *technology* will work for 100 % of the population 100% of the time. [Hieronymus' Law]

7th Law: *Device failure* can occur for two basic reasons: **Mind power** (1st Law) or **Spiritual Power** (2nd Law)

$$\Delta DF = \Delta M + \Delta SP$$
$$\Delta M = \Delta MI + \Delta CS$$
$$\Delta S = \Delta G + \Delta SO$$

(DF = Device Failure, M = Mind, SP = Spiritual Power, MI = Mind Interface, CS = Consciousness, S = Signal, G = Ghost and SO = Soul. For more information refer to either Soul Science: The Electric Analog or Souler Power: Your Electric Soul)

8th Law: Any unbalanced **Life Electric field** within a **charged body** will cause a net **transmission** of **Signal** in the direction of the **weaker** or erratic part of the **LE fiel**d inside the **charged** body or *device*. [The Law of Balance]

9th Law: Quantum particle behavior (QPB) synchronization is lost when QPs move through alternating layers of repeating materials and the pattern the QPs expect to **see** changes or does not occur. [The Law of Change]

10th Law: When two living beings with living sentient spirits (**Ghost**) **merge** or “become as one", a third **new soul** (and being) is produced. (A **Newbe**)

11th Law: **Life Current** (**LI)** is equal to **Life Voltage** (**LV**) times **Life Resistance** (**LR**). **LI**=**LV***__LR__ [Reich's Law]

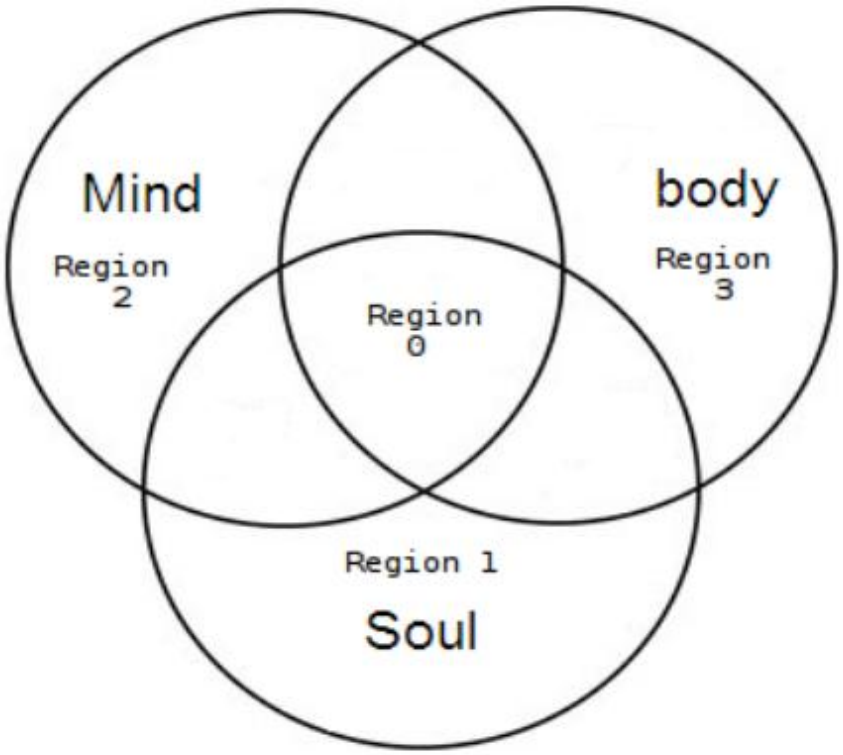
* “It is a basic law in orgone physics that *the stronger orgonotic system attracts the weaker one and withdraws its charge*." Dr. Wilhelm Reich in The Cancer Biopathy, page: 261, 1st paragraph, 7th sentence. And in the next sentence: "(This is exactly the opposite of the action of the electric charge in which the energy flows from the stronger to the weaker system.)"

So what do these eleven laws of **Spiritual Mechanics** mean? There are some things you can do and some you cannot. Also - your physical health can be affected by building and using this technology. So please be very careful. These laws are explained more fully in the appendix of this eBook and other Soul Science eBooks and on the Soul Science Institute website. http://www.soulscienceinstitute.us/.

Annex - 2 Soul Science Regions

Diagram - 1 depicts the known EHB Mind-Body-Soul system. **Region 0** is the "quantum level" of this Universe or the "Void" as I prefer the **Material Cause** (**MC**). It is beyond the "event horizon" of this Universe where "objective reality ceases to exist".

Region 0 is the key to **Spiritual Technology** and Soul Science in general. Why is this information important? Because if you do not understand what you are doing - or how this technology works - you will die prematurely!



Region 3 is the physical dimension of this Universe. All Soul Science Technology (SST) *devices* are of Region 3.

Regions 1, **2** and **3** are provided by **Region 0**

Annex - 3 Reich's Law

Reich's Law for Life Electricity: **LV = LI * LR**

Where **LV** is **Life Voltage**
and **LI** is **Life Current**
and **LR** is **Life Resistance**

and **SP = LV * LI**

or **$SP = LI^2 * LR$**

where **SP** in the two equations above is **Spiritual Power**

and by convention: **Life Resistance** equals **Life Voltage** divided by **Life Current** or

LR = LV / LI

This implies that there should be orgone "R values" for various organic materials used to attract and absorb orgone. And after experimentation this is what you will find.

Also - there should be an orgone unit of measure. There is definitely a unit of measure for **LI**. I think that Dr. Reich was on the right track using the Geiger-Muller tube to count the "blue waves" inside his IWO - which are **Life Currents** (**LI**). Thus the size of the detector tube can be used to determine the cross-sectional **LI** in a given "slice" (area) of volume.

A unit of measure for "orgone", Chi or **Signal of Life** is more complex - because we are talking about signals not energy. Thus it should be possible to design a **Signal** Strength meter to measure Orgone, Chi or

the **Signal of Life**. The *Grebennikov meter* is a **Signal** "strength meter". We believe the spider silk reacts to any nearby Chi field - causing the “drawing charcoal” to move in the jar. For more on the Grebinnikov Signal Strength Meter see Annex - 7.

Annex - 4 Soul Science Technology (SST) word and phrase definitions

(1) *Device* - A Region-3 physical construction that accomplishes a manipulation of Region-0 or the "Void".

(2) *System* - A group of Region-3 constructs that work together to accomplish manipulation or control of Region-0.

(3) *Technology* - Hardware that interacts with or controls Regions: 1, 2, 3 for a desirable result(s).

(4) *Spiritual Device Failure (DF)* - The failure of a *device* caused by a Region-1 interaction with a Region-1 or Region-2 being

(5) *Living Systems* - A system that includes Region-1 components or living organisms.

(6) *Orgone amplifier* - A *device* that collects and amplifies the **Signal of Life** (Chi, orgone, Prana) or the **Signals** of living beings that either enter the device or leave behind their DNA in the construction of the device. This can be a frequency change or a **Life Voltage** (**LV**) change.

The **Signal of Life** is "generated" by living beings.

A Region-3 *device* can only amplify the **Signal of Life** - it cannot create it!

(7) *Amplifier* - A *device* or *system* that increases the **Signal of Life** or the **Signals** of living beings.

(8) **LE** *transformer* - A *device* that causes the "living energy" to be released by the Void or **MC.** The living energy in this dimension is **Life Current** (**LI**).

A Region-3 *device* can only transform the **Life Current** – it cannot “generate” or create it.

(9) **IWO** – Iron Walled ORAC

(10) **Life Current (LI)** *device* – A *device* that can deliver any **Life Voltage**.

(11) **Life Voltage (LV)** *device* – A *device* that can deliver any **Life Current.**

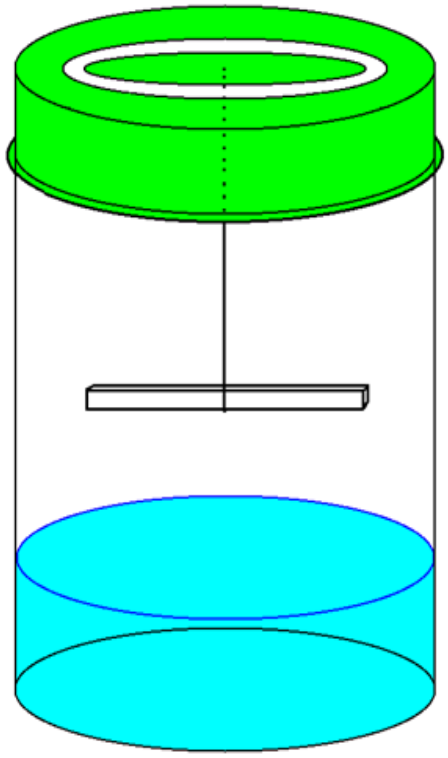
Soul Science Technology (SST) *Devices* and *Systems* accumulate, and manipulate FQPs - just as these *Devices* and *Systems* interact with and manipulate the Ether.

What is unique about Soul Science Technology (SST) *Devices* and *Systems* is that with various combinations of materials and construction patterns - the Ether can be transformed and its energy utilized!

It should be noted that SST *Devices* are one type of Ether or Void manipulation device. There are many more...

Annex - 5 Grebennikov's Signal strength Meter

Viktor Grebennikov's **Signal** Strength Meter is made with a glass mason jar. He filled the jar with water (looks like about 1/4 of the jar's height) and then suspended a piece of drawing charcoal on a strand of spider web from the top. See the following diagram. Grebennikov probably pushed an ice pick through the soft metal of the top and tied a knot at the top end of the silk so that the drawing charcoal would not fall down into the water. More information about Viktor Grebennikov can be obtained from the Rexresearch website. Grebennikov's book excerpt on the Rexresearch website also contains a diagram of the Grebennikov Meter calibration label for the jar. Grebennikov placed the jar on the calibration diagram.



Viktor Grebennikov's **signal** strength meter

See Annex – 6 for more information about the Grebennikov signal strength meter

Annex - 6 How is LE measured?

Answering this question begins with Reich's Law and progresses through the analysis of Grebbenikov's **Signal** strength Meter. Reich's Law for **Life Electricit**y is very much like Ohm's Law for electricity. In fact Ohm's Law inspired me to modify Reich's Law for LE in Spiritual *devices* and *systems* when I was analyzing the LE through-put (LEoutput/LEinput) of a LE Transformer one day in 2003.

Life Electricity – is a general term referring to the "Living Energy" from the Void - not biological electricity but **Spiritual Energy** (SE) that all living things produce and generate with each cell division. There are two main components of **Life Electricity** – **Life Current** and **Life Voltage**. **Life Resistance** and **Spiritual Power** round out the other components and form the basis of **Reich's Law** for Life Electricity.

I realized that my original ideas for my first book about lemons and fat cells being **Life Electric** batteries did indeed point to an Ohm's Law like equation consisting of life resistance, life voltage and life current. Hence the reason I chose **Life Electricity** in the first place because I could not resolve what component of the “electric circuit” the Taoist Internal Energy (Chi) practitioners were talking about.

I know what you’re thinking - I wrote in part 1 of this eBook that **LI** is released by the Void. So how can a living body produce **LI**? This is what my first book Soul Science covers and it is not necessary to go over that aspect of the "Living Energy" again here. The point is that Reich's law applies to "living" and "non-living" systems.

Each eBook release of Soul Science Technology will contain information and theory from the Original Pioneers and perhaps some of the gleaned "notions of operation" from the new pioneers in this field.

Grebbenikov **signal** strength meter (see Annex – 7) measures the **signal of life** or “orgone” or “chi” that is broadcast in the **MC** by a

device or living creature. I have not been able to get a deflection of the drawing charcoal when trying to measure the eloptic signal given off by matter.

The Grebbenikov **signal** strength Meter connects a once living component (the drawing charcoal) via a spider silk to a metal disk (the jar lid). As previously stated the spider silk is the key to this *device*.

I have yet to test the Grebbenikov **signal** strength Meter – however I think the test can be approached as any ORAC test – where the signal of life is broken down using Reich's Law in which **LI**, **LV** and **LR** are calculated and tested.

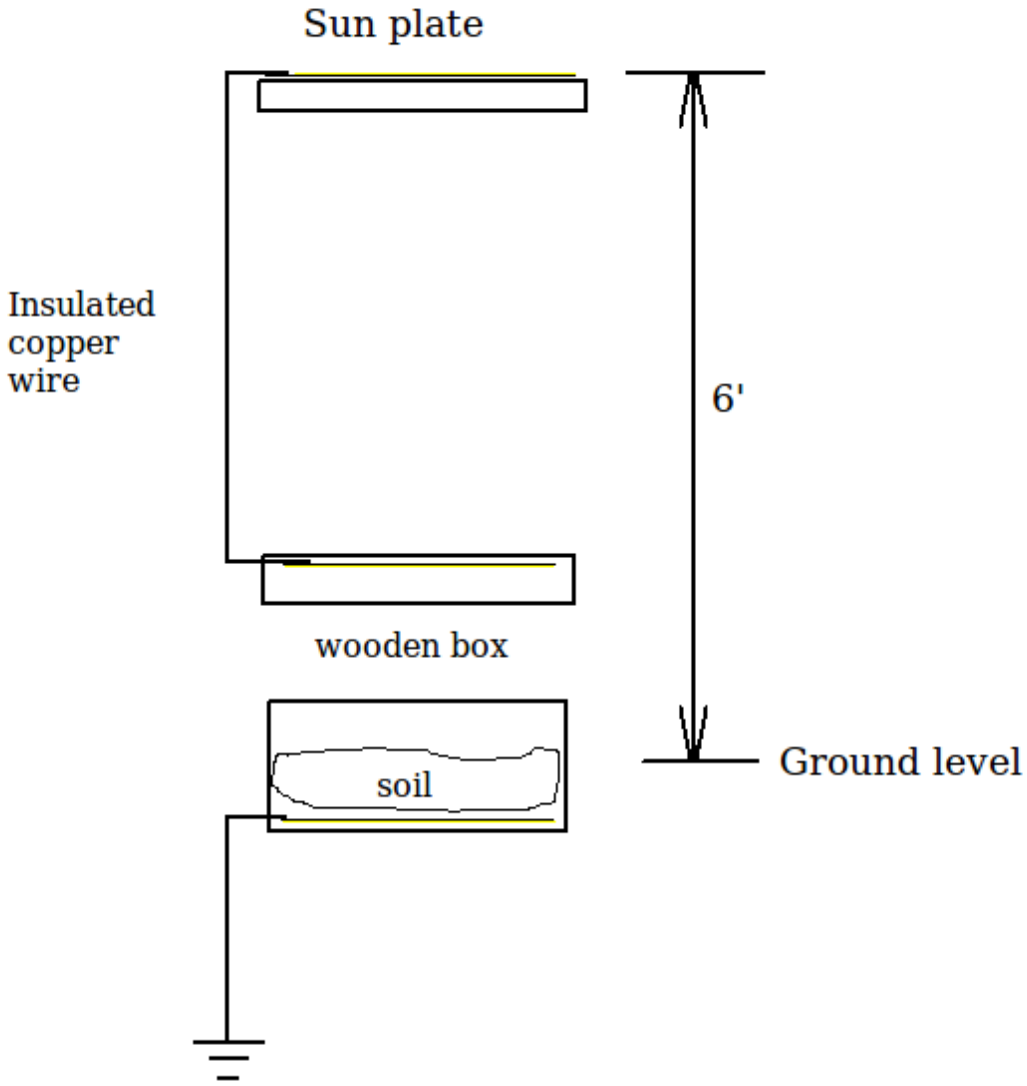
Annex - 7 Hieronymus Radiant Energy *System* or the Hieronymus wireless sunlight transmitter

Galon T. Hieronymus had experimented with transmitting eloptic signals over copper wire for some time before trying to transmit "chlorophyll by wire". He used old wooden cigar boxes of various sizes with lids that fit over the bottom of the box (the lid is like a tray). He placed aluminum foil in the bottom of each box and in the lids. See the Hieronymus radiant energy system diagram below.

He made similar "plates" for the outside that would receive the Sun's energy.

The Sun plates were connected to the aluminum foil in the lids by an insulated copper wire. The aluminum foil in the bottoms of each soil box were connected to an Earth ground (a water pipe).

I recommend that you use sheet steel if you plan to grow your plants in the dark. Aluminum is not something you want to take into your body! And you do not want to receive the aluminum **eloptic signal** that will be given off by the ORAC wooden boxes.



Hieronymus Radiant Energy transfer system

Annex - 8 Dayton Miller verified the "dynamic ether"

Dayton Miller conducted thousands of observations (“turns”) using very sophisticated Light Beam Interferometers (far more observations than either Albert Michaelson and Edward Morley performed separately or together as in their famous “Michaelson-Morley Experiment”) at various altitudes. While Dayton Miller was alive his work was never refuted.* In fact Dr. DeMeo reports that “Dayton Miller's 1933 paper in Reviews of Modern Physics, which detailed his 20 years of careful scientific research, remains most definitive body of work on the subject of light beam interferometry.”*

* Pulse of the Planet Number 5: The Heretic's Notebook Edited by James DeMeo, page: 114, “Dayton Miller's Ether-Drift Experiments: A Fresh Look” by Dr. James DeMeo, Ph.D.

Also presented in this article, on page 114, by Dr. DeMeo's is the following excerpt from a letter written to Robert Millikan from Albert Einstein in June 1921:

“I believe that I have really found the relationship between gravitation and electricity, assuming that the Miller experiments are based on a fundamental error. Otherwise, the whole relativity theory collapses like a house of cards.”

(WOW! Einstein admitted publicly, late in his life, that his “biggest” blunder had been ignoring the math that clearly pointed to the fact that the Universe was expanding! He claimed that he chose to ignore the results for “mathematical perfection”! Does it appear that ignoring the mathematical results which suggested the Universe was expanding was a bigger blunder than assuming there was no Ether-drift! Which directly implies the speed of light is NOT a constant!!! You decide. I can assure you the Church of Science shall never reverse itself. Einstein was never able to devise a Unified Field Theory based on his Theory of Relativity or his Special Theory of Relativity. In fact E does not equal MC2 E is proportional to MC2 because C is NOT a constant!)

The bottom line Dayton Miller's scientific work prevented Albert Einstein from receiving the Nobel Prize for his Theory of Relativity. The reason you ask? Because Dayton Miller proved that the speed of light is not a constant. Through his experiments Dayton Miller also

discovered the existence of the Dynamic Ether. It's apparent entry location for this Universe is near a point in the North-Eastern sky - that is almost in line with the Earth's tilt axis.

Why is the "Dynamic Ether" important? Because it is a very different component of the Cosmos. I have theorized that the Dynamic Ether comes from outside of the event horizon or **Material Cause** in which our Universe resides. That it may well be the "sea of infinite energy" that some have speculated exists in the Cosmos before the Quantum Observer "arose". The Taoist (Chinese) Philosophy records that the "One" (Quantum Observer) who created everything arose from the "Tao" or the "sea of infinite energy".

If so it represents a river of **LI** that apparently has a different "polarity" than the Ether or **MC**. This ties in with a non-religions Taoist theory of the Universe presented by Kosta Danaos in his books about John Chang (his Master). See the Bibliography. More on this author in future editions.

The bottom line here - a new source of **LI** can be tapped into!
